Art Unit: 3753

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-32, drawn to a flexible heat exchange interface, classified in class 165, subclass 46.
 - II. Claims 33-38, drawn to a temperature control system, classified in class165, subclass 282.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it further includes a reservoir and first and second feed pumps. The subcombination has separate utility such as use in a system that does not include a reservoir and that does not include a plurality of pumps.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3753

4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. This application contains claims directed to the following patentably distinct species of the claimed invention in Group I

Figs. 1A, 1B, 1C

Figs. 2A-2F and 3A-3C

Figs. 5A and 5B

Fig. 6A

Fig. 6B

Figs. 6C and 6D

Fig. 7

Fig. 8A

Fig. 8B

If the invention of Group I is elected, applicants are required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims

Application/Control Number: 10/665,074

Art Unit: 3753

shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is

generic to the above species.

Applicant is additionally required to elect one of the patentably distinct

subspecies of the claimed invention shown in each of Figs. 4A to 4L

6. This application contains claims directed to the following patentably distinct

species of the claimed invention in Group II

Fig. 9

Fig. 10

Fig. 11

If the invention of Group II is elected, applicants are required under 35

U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the

claims shall be restricted if no generic claim is finally held to be allowable. Currently,

claim 33 is generic to the above species.

7. Applicant is advised that a reply to this requirement must include an identification

of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless

accompanied by an election.

Page 4

Application/Control Number: 10/665,074

Art Unit: 3753

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Page 5

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- 8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Teresa J. Walberg whose telephone number is 571-272-4790. The examiner can normally be reached on M-F 9:00 5:30.

Application/Control Number: 10/665,074 Page 6

Art Unit: 3753

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gene Mancene can be reached on 571-272-4930. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
